29 pounds; 12" d x 16" w x 10" h

Microdermabrasion removes dead cells from the skin's surface. This action promotes new cells to grow at the epidermis and dermis level.

Before and After a Series of Treatments

A series of 8 treatments combined with high end cosmeceutical products cleared up the acne in this client.

Topical acne cosmeceutical products got the acne under control on this client. Ten microdermabrasion sessions later and the client has fantastic results.

Sun damaged skin is corrected with a series of six microdermabrasion peels, combined with topical pigmentation lightener.

Microdermabrasion at its finest

- ✔ **Powerful**
- ✔ **Effective**
- ✔ **No messy cleanup**
- ✔ **Low operating costs (under \$3)**
- ✔ **Hands-on training program-at your facility!**
- ✔ **Best service available**
- ✔ **No downtime guaranteed!**

To achieve optimal results with your microdermabrasion system you should use the best skin care product available. You should use products that contain the highest concentration of active ingredients for optimal repair after exfoliation with microdermabrasion.
